Townsend's Designs, LLC

Abstract

This technical note consolidates equations spanning adaptive matter, information-mediated interaction, continuous learning, time modulation, and human-state coupling.

1 Unified State

$$\mathcal{S}(t) = \{M, W, \Phi, \tau, \mathcal{H}\} \tag{1}$$

2 Evolution

$$\frac{d\mathcal{S}}{dt} = \mathcal{F}(\mathcal{S}, \mathcal{E}) \tag{2}$$
